- English

EDUCATION

Technical School - Programmer Profile

Technikum Kompunikacyje - Cracow

2020 - 2025

SKILLS

- Python
- Django
- JavaScript / TypeScript
- React.js - Vite, Next, CRA
- Material UI
- Express.js
- Git, Github, Gitlab
- MySQL, MongoDB, Prisma
- Tests - Pytest, Jest
- Docker
- Numpy, Scipy, ROS2
- Linux

PROFILE

I have been passionate about programming for over 8 years. I began my journey by creating websites, and over time I developed my skills toward building web applications and APIs using Django, Express.js, and React.js. I also have experience developing mobile applications with React Native.

I specialize in Python and JavaScript—languages I understand deeply, both practically and theoretically. For several years, I have been tutoring these technologies, which not only helps me reinforce my own knowledge but also allows me to share it in an accessible way.

I prioritize clean, clear, and well-organized code that follows best programming practices.

WORK EXPERIENCE

HexArcana Cybersecurity

I worked on a server administration dashboard, focusing on both frontend and backend development. I used React.js for building the user interface and Django for implementing the API.

Python   Django   JavaScript   React.js   Pytest

Internship
January 2024

Solidstudio

I worked on creating CLI applications using Node.js, focusing on building tools for automating report generation and data processing.

Node   Jest   GitLab   SheetJS

Internship
May 2023
